

California is Open

Follow These CDC Travel Guidelines

California's economy is now fully open. Help keep California open and our communities healthy by following CDC travel guidelines. Read the [CDC's full travel guidance](#).

Delay Travel (Both Domestic and International) Until You're Fully Vaccinated¹

If you're fully vaccinated, you can travel safely within the United States (and you don't need to test or quarantine). If you're fully vaccinated and traveling internationally, you must follow [CDC testing guidelines](#) before and after your return to the US. Please follow all CDC and [California masking guidelines](#).

Please stay informed of [CDC Destination Travel Alerts](#) that will warn you about high transmission rates in an area.

If You Are NOT Vaccinated, But Choose to Travel, Get Tested Before and After

If you are NOT vaccinated, but choose to travel domestically, get tested with a [viral test](#) 1-3 days BEFORE travel AND 3-5 days AFTER travel. Also, even if you test negative, stay home and self-quarantine for a full **7 days** after travel.

If you don't get tested, stay home and self-quarantine for **10 days** after travel.

If you're NOT vaccinated, and traveling internationally, you must follow [CDC testing guidelines](#) before and after your return to the US.

Always Wear a Mask on Public Transportation (Regardless of Your Vaccination Status)

EVERYONE must wear masks AT ALL TIMES on public transportation (including airports, planes, trains, buses, stations, etc.) into, within, or out of the U.S.

Read our [guidance for the use of face coverings](#).

¹Someone is considered fully vaccinated two weeks or more after their second dose of Pfizer/Moderna or two weeks after receiving the single dose J&J vaccine.
